

TRAININGS COURSE

The results of the project process will be incorporated into the design of this course. The knowledge gained by the partners during the joint work is to be shared with other interested parties. The project partners are represented in the team of speakers so that all aspects can be communicated effectively. We look forward to welcoming interested participants!

Location: The course takes place in Paderborn (DE) and Liepaja (LV).

Duration: Three days + 2 days for arrival and departure

Costs: 350,--€ course fee (incl. material and lunch)

Accommodation: We will help you to find accommodation

Registration: The dates are shown in the registration form

Working language: German and English

Content: The course addresses aspects of the interdependence of water ↔ society.

During the project process, we have developed and documented numerous examples that will be analysed, discussed and, if necessary, transferred to other circumstances during the course.

The central content of the course is to raise awareness of the importance of water, but also to convey appreciation for our cultural heritage.

Aim: To expand knowledge on the topic of water ↔ society:

- on the origins of our cities on the waterfront
- on dependence on Nature ↔ Mensch
- on the importance of sustainability
- on the question of individual responsibility

Exchange with the participants about their experiences

Programme: see attachment (A1)

Speakers: All speakers come from the partner group of the project.

Registration: The registration form can also be found in the appendix(A2)
